-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action or the MPEP.

#### ***Specification***

The disclosure is objected to because of the following informalities: The "Reference to Related Applications" section needs to be re-updated to include the new patent number. Appropriate correction is required.

#### ***Double Patenting***

Claims 46-70 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-41 of U.S. Patent No. 6,749,580. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of this application overlap with the claims of the parent. Both are related to the continuous flow catheter having two lumens, one shorter than the other, and having a diffuser on the shorter lumen.

#### ***Allowable Subject Matter***

Claims 46-70 would be allowed if a terminal disclaimer as suggested above were filed.

The following is a statement of reasons for the indication of allowable subject matter: Regarding claims 46-56, none of the prior art suggests the proximal portion as claimed with the connector portion, wherein the return lumen terminates at the connector portion. The addition prior art cited exemplifies that connectors are well known in the art and are attached to catheters at various positions, however, none show

the return lumen terminating at the connector portion, in combination with the other claimed elements. Regarding claims 57-70, these claims further recite the diffusers and are allowed for similar reasons set forth in the parent application.
